

Member Meetings

### Opportunity for information, discussion, fellowship

Meetings for the members of Red Lake Electric Cooperative will be held at four locations within the Cooperative's service territory. Meetings will be held within Districts 3, 6 and 9 and an informational meeting will be held in the Goodridge area.

The meetings are held to inform attendees on current issues and programs associated with the Cooperative. Official business will be conducted at the three district meetings, which will include the election of a director candidate.

Even though a meeting may not be scheduled within the district in which you reside, you are welcome to attend a meeting of your choice. Anyone requiring special access or assistance at any one of the meeting sites should call Red Lake Electric in advance so arrangements can be made. Door prizes will be awarded and lunch will be served at each meeting.

### **QUICK TAKES**

A look at some statistics from your Red Lake Electric Cooperative

The chart below shows the amount of control time for Red Lake Electric Cooperative's Off-Peak customers this heating season compared to the same period the past four years. Even with an increase in systemwide demand for energy, control times have been less this year and last because of renewable (Wind) generation added to Minnkota Power. Cooperative's resources. In 2009, generation added at the Ashtabula, ND wind farm increased Minnkota Power Cooperative's Wind Energy resources to 358 Megawatts (MW). The Langdon and Ashtabula Wind Farms are the largest addition to Minnkota's energy sources since the Coyote coal-fired power plant came on line in 1981.

# ISTRICTS

### New directors needed in District 3 and 6

Joyce Johnson and Henry Wieland are not seeking re-election

Members in the Viking and Newfolden area will have a new director representing them on the Board of Directors at Red Lake Electric (6117007.01 Wilma Arlt) Cooperative. Joyce Johnson, the director from that area for the past six years, is completing the third vear of her three-year term and is not seeking re-election in 2010.

Likewise, members in the Red Lake Falls and Plummer area will have a new director representing them at Red Lake Electric Cooperative. Henry Wieland, the director serving this area, has been representing District 6 since 1982. Wieland is completing the term he was re-elected to in 2007 and is not seeking re-election in 2010.

Johnson was first elected to the Board of Directors in March, 2004 and was re-elected to a second three-year term in 2007. Wieland was appointed to fill a vacancy on the board in 1982, elected to it in 1983 and was re-elected to eight consecutive 3-year terms by the District 6 members.

Members of District 3 (West Valley, New Maine, Foldahl, Marsh Grove, New Folden, Viking and New Solum Townships) will elect a director candidate at their district meeting to be held at the Newfolden Community Center Feb. 8.

Joyce Johnson

Members of District 6 (Wylie, Browns Creek, River, Louisville, Red Lake Falls, Gervais, Emardville and Terrebonne Townships) will elect a director candidate at their district meeting to be held at the Red Lake Falls Community Hall Feb. 9.

The candidate receiving the most votes at their respective district meeting will be placed on the ballot for election at the Cooperative's annual meeting March 31.

Members can also be placed on the annual meeting ballot by petition. At least 15 members of the respective district must sign a nomination petition and return it by

locations

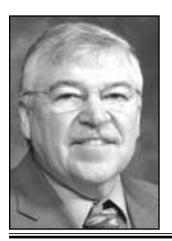

DISTRICT 9

**Henry Wieland** 

March 1 to be placed on the annual meeting ballot. Nomination (3834007.03 Melissa and Dustin Keller) petition forms are available by calling or visiting the RLEC office in Red Lake Falls.

Members considering running for the position of director should note the article located elsewhere in this issue that defines qualifications for being a director.

If you have additional questions on director responsibilities or meeting schedules, contact Johnson in District 3 at 218-523-4961; Henry Wieland in District 6at 218-253-2313; or Roger Johanneck, general manager, at 1-800-245-6068.

by Roger Johanneck

#### 2010 budget approved

Your Red Lake Electric Board of Directors met on Dec. 30 and approved the Cooperative's operating and capital expenditure budgets for 2010. Those two annual budgets provide a guide for us to carry out the business of the Cooperative for the coming year.

In it's simplest form, our operating budget consists of estimating what our expenses are going to be and making sure we'll have enough revenue to cover those expenses.

Our capital expenditures budget includes planned replacements of line equipment, vehicles, office equipment, as well as systematic improvements to and replacements of our electric distribution plant. Having dependable equipment and the right tools for the job is a necessary component of being a reliable energy service provider for our membership.

Trying to determine what is in store for (4401021.02 Dean Lawrenz) us in the coming year is never an easy task or an exact science. Preparing a budget requires trying to find answers to many questions. We know before the ink dries on the budget report that the numbers we put together are not perfect, but hopefully close enough so that we are prepared for the events encountered in 2010.

For me, preparing a budget is a process similar to packing for a week at deer camp. Do I have the right clothes and gear to hunt if the thermometer reaches 60 degrees? Or dips to 20 below? What if it rains or I have to walk through a wet area because the beavers have dammed up the ditch near my favorite ridge? Most times I error on the side of having gear that I may not need, just so that I am prepared for whatever mother nature sends our way.

Likewise, the process is similar when forming a budget for the coming year. We ask ourselves questions and determine what we need to do to keep the lights on.

Typically, distribution plant construction and replacements are part of a longer range work plan that the Cooperative prepares when applying for Rural Utility Service (RUS) funding. Information prepared in replacement at a later date are now moved to the forefront if equipment fails sooner than we had planned.

In our part of the country, weather plays a big role in determining how much energy our members will need to keep warm in winter and cool in summer. How about rain during harvest? Having a wet or late harvest has a big impact on crop drying; we need look no further than our most recent harvest to see the impact of what a wet/late fall with lots of crop to dry does to the demand for energy.

Besides weather, the price of competing fuels such as heating oil and propane also influence the amount of electric energy our customers use.

What about plug-in space heaters? How many customers will use these portable heaters as a magic formula to cut heating costs or in place of the non-electric heat source intended during peak control times? Lets hope we have learned our lesson on plug-in space heaters and our members will not use these electric space heaters in place of back up heating systems over peak periods.

Of all the expenses the cooperative budgets for, our wholesale cost of (5431004.02 Casey J. and Bob Klipping) power we purchase from Minnkota Power Cooperative is our largest expense. Wholesale rates are rising and are projected to increase in the near future, not only for Minnkota Power, but also for most electric utilities across our state and nation.

Minnkota will be raising it's wholesale cost of power in April of this year by 7.5 percent. This will add about a half million dollars to our cost of power in 2010 for the nine months it is in place.

An increase of that amount is simply too much for Red Lake Electric to absorb without passing that on to our membership. It is likely our rates will need to increase 6 percent in May to cover the increased cost of wholesale power.

In 2010, our cost to provide electric service to Red Lake's members is budgeted at \$10.7 million. Of that amount, \$7.8 million is our budgeted wholesale power cost and represents 72 percent of our expenses. While the cost of complying with environmental regulations and meeting renewable energy mandates are driving up wholesale power costs across our state and nation, Red Lake Electric has been able to keep it's share of the cost of providing electric service to it's members stable. Red Lake's cost of providing service in 2009, less our wholesale power cost, decreased by 1.25 percent from the previous year. The budget for 2010 calls for an increase in Red Lake's costs of 1.7 percent over 2009 and less than a half percent increase over 2008. We're optimistic we will be able to improve on those numbers, but for now that is what we have prepared for in our 2010 budget.

Hopefully you can tell from what I have shared with you here, there is wide scope of numbers and activities included in our annual budget report.

The process for putting a budget together is (7417003.01 Kenton L. Freberg) based on a combination of historical trends, work plans we have in place and changes we know will be forthcoming in 2010.

It is our intention that this budget and our effort to carry this plan out will keep us on course to remain financially strong so that we can continue to be a source of reliable, competitively-priced energy for you in 2010 and beyond.

#### **Membership Meetings**

It is that time of year again, when the Cooperative holds it's District and informational meetings throughout our service area. I encourage you to check out the meeting schedule included in this month's issue of the Volts and Jolts and welcome members to join us for one of the meetings located in vour area.

Our meeting format will be similar to previous years where we will provide information that we think you will find interesting and helpful, give you a chance to ask questions and visit with RLEC staff and neighbors over pie and coffee. Hope to see you there.

# **Annual Meeting March 31**

Red Lake Electric Cooperative members are encouraged to mark their calendars for the Cooperative's annual meeting. The meeting will be called at 10:30 a.m. on Wednesday, March 31, at the Ralph Engelstad Arena in Thief River Falls.

### Halogen floor lamps: a safety reminder

Here's a home safety reminder about halogen floor lamps that will help you reduce the risk of fires or burns. These fashionable lamps produce a clean, intense white light, but they also operate at much higher temperatures than a standard incandescent light bulb.

The Electrical Safety Foundation International suggests you keep these simple safety tips in mind:

• Never place a halogen floor lamp where it could come in contact with draperies, clothing or other combustible materials.

• Keep your halogen lamp and its cord away from traffic areas, where it could be easily tipped over.

• Turn the lamp off whenever you leave the room for an extended period of time.

• Carefully read all instructions and warnings that accompany the lamp for these and other important safety tips.

• Never use torchiere lamps in children's bedrooms or playrooms. Children may play with lamps or place combustibles such as stuffed toys or clothing too close to the bulb. • Make sure all the light bulbs in your home are the appropriate size

and type for the lamp or fixture. Visit the ESFI Web site at www.electrical-safety.org for more information.

## **Mission Statement**

It is the mission of Red Lake Electric Cooperative to enhance the quality of life for people of our service area by consistently providing quality electric service and other valued services while holding our employees, our community and our environment in high regard.

**Red Lake Electric Cooperative, Inc.** One of the Minnkota Power Systems

20-, 10- and four-year work plans help us prepare for serving areas where load is growing.

The capital budget also considers electric plant aging studies and where we need to plan for the systematic replacement of equipment, poles and conductors before they become unreliable or undersized.

Current information, such as service interruptions due to a section of faulting underground cable, will influence how we carry out projects of a longer range work plan. Projects scheduled for

### WE PROUDLY PRESENT TO YOU The Red Lake Electric Cooperative **Customer Service Guarantee**

It's short and simple! Red Lake Electric Cooperative employees will meet or exceed your expectations of friendly, courteous service and will meet any commitments they make to you. If your expectations of the service provided by our employees is not met, please contact me at the Red Lake Electric Cooperative office, 253-2168. You will receive \$5.00 for your inconvenience and our promise to serve you better in the future. Our employees' commitment to quality customer service makes this guarantee possible.

You will be credited with \$5 on your electric bill.

# Red Lake Electric **Cooperative**, Inc.

One of the Minnkota Power Systems

# Things you should know about your electric service

#### **BILLINGS AND COLLECTION**

You will receive your energy bill on or near the 20th of each month.

Payment of your monthly energy bill is due on the 20th of the month. You may pay your bill in person at RLEC during office hours, use the 24-hour driveup drop box located next to the RLEC office, by Auto Pay, or by mail. Payment must be in the office, drop box, Auto Pay, or in the mail, as evidenced by the postmark, by the 5th day of the following month to avoid a late payment charge. A 1 1/2% monthly late payment charge will be computed on delinquent energy bills, the minimum late payment charge will be \$1.00.

If your payment is not received by the 15th of the month, a final notice of disconnection statement will be included on your following bill. The final notice statement will notify you when your electric service will be disconnected if the delinquent amount remains unpaid. If an employee is sent to disconnect your electric service, a \$50 collection fee will be charged to your account, even if you pay the collector.

To have a disconnected service reconnected, all amounts owing, a \$50 reconnection fee, and a security deposit must be paid. If the service must be reconnected after normal working hours, a \$100 reconnection fee must be paid.

#### **BAD CHECKS**

A \$15 charge will be levied each time a check is returned because of nonsufficient funds, account being closed or payment stopped.

#### OUTAGES

In case your electricity goes out, please do the following:

1. Check your fuses or breakers at the yard pole or meter pedestal.

2. Call your neighbor to see if they are out of electricity also.

3. Call the RLEC office (218-253-2168 or 1-800-245-6068) during working hours or 218-253-2200 after hours. We will accept collect calls for outages only.

#### **METER TESTS**

RLEC has a schedule in place to have its meters periodically tested for accuracy. Results from these tests show that meters generally slow down with age; however, if you think that your meter is recording too much usage, RLEC will test it for accuracy. You must pay a test fee in advance of the test. If the meter test shows that the meter was inaccurate, the test fee will be refunded to you.

#### STOPPED METERS

If you find your meter has stopped and you are using electricity, please contact the office immediately so we can replace it. Average consumption will be billed to the member for the time the meter was stopped so there is no advantage in not reporting a stopped meter.

#### METER READINGS

An automated meter reading system is utilized to obtain monthly meter readings. Although the system is normally reliable, there is always a chance that the correct reading has not been transmitted to the office for billing. Customers should periodically read their meter and compare it to the reading on the billing statement. If the actual reading is not close to the billing statement reading, please call the office.

#### **GENERAL SERVICE RATES**

Facilities charge variable \$17 to \$23 month First 500 KWH .....9.0¢ Kwh Over 500 KWH (Jan.-Mar.) .....7.5¢ Kwh Multiphase users add \$17/month cost of service charge.

Standby, \$9/month (meter disconnected but the power line retained; standby is not available on services larger than 15 KVA transformer capacity).

Security light, \$7/month, high pressure sodium, \$8/month, mercury vapor; water heater flat credit, \$5/month (on January-April billing); off-peak equipment charge, \$4/month per heat meter; off-peak electric heat rate, 4.0¢/kWh long-term control, 5.8¢/kWh short-term control.

Volts and Jolts

# **Recipe corner**

#### **Angel Biscuits**

- 1 pkg. active dry yeast 4 to 4-1/2 c. self-rising flour
- 1 tsp. sugar
- 2/3 c. shortening
- 1/2 c. warm water
- 1 c. milk or 1-1/4 c. buttermilk

Grease three 8-inch round cake pans. Dissolve yeast in warm water; set aside. Stir flour and sugar together. Cut in shortening until "pea" size. Stir in yeast, water and milk until dough begins to pull away from bowl. Turn out onto floured surface and knead gently ten to twelve times. Roll 1/2-inch thick, and cut with a 2-inch cutter. Place 8 to 10 biscuits in each prepared pan. Cover with wax paper. Put in a warm place to rise for 1 hour. Heat oven to 400 degrees. Bake 20 to 25 minutes or until golden brown. Yield: 2 to 2-1/2 dozen biscuits.

#### Johnson Gravy

1 can Spam

3 Tbsp. shortening

2 Tbsp. flour

2 c. milk

4 hard-boiled eggs, chopped

Salt and pepper to taste

Chop Spam into small cubes and brown in shortening. Add flour and blend well; add milk, stirring constantly. When thickened, add chopped eggs and salt and pepper to taste. Serve over biscuits. Yield: Serves 6.

#### Sausage Gravy

- 2 lbs. ground pork sausage, mild or spicy
- 4 Tbsp. flour
- 2 c. half-and-half
- 1/2 c. skim milk or water

In a large skillet, brown sausage over medium heat. Stir in flour until dissolved. Slowly add the half-and-half stirring constantly until thickened. Add skim milk or water and cook until desired thickness is achieved. Serve over biscuits sliced in half. Yield: Serves 6.

#### **Party Meatballs**

lb. ground beef
egg, slightly beaten
/2 c. bread crumbs
/4 c. milk
tsp. salt
/4 tsp. pepper
small onion, minced
Tbsp. Worcestershire sauce
/2 tsp. garlic salt

- 1 large (32 oz.) jar of grape jelly
- 1 large bottle of chili sauce

In a large bowl, mix all ingredients together until blended. Roll into small balls, about 1-1/2 inches in diameter. Place on a cookie sheet and bake in a 350-degree oven for 15 minutes.

In a saucepan, melt jelly and chili sauce. Add meatballs to sauce. Keep warm until ready to serve. Serve with toothpicks. Yield: Makes approximately 30 meatballs.

Note: A good way to serve these warm is to keep them in a small crockpot on low.

Chili

- 2 lbs. lean ground beef 1 large onion, chopped
- 3 Tbsp. chili powder
- 2 tsp. salt
- 2 cans chicken broth
- 1 tsp sugar
- 2 large cans crushed tomatoes

2 cans chili hot beans, undrained

Cook beef and onion in a large skillet until beef is browned and onion is clear; drain. Add chili powder and salt. In a large soup pot, combine broth, sugar and tomatoes. Heat to boiling; add beef and beans. Return to boiling and then reduce heat. Simmer, covered, about 20 minutes. Yield: Serves 6.

#### **Cheddar Dill Bread**

- 2 c. self-rising flour
- 1 Tbsp. sugar 1/2 stick butter or margarine
- 1 c. shredded sharp Cheddar cheese
- 2 tsp. dill weed
- 1 egg 3/4 c. milk

In a large bowl, combine flour and sugar. Cut in butter until crumbly; stir in cheese and dill. In a small bowl, beat egg and milk; pour into dry ingredients and stir just until moistened. (Batter will be very thick.) Pour into greased 8-inch by 4-inch by 2-inch loaf pan. Bake at 350 degrees for 35 to 40 minutes or until bread tests done. Cool in pan for 10 minutes before removing to a wire rack. Yield: 1 loaf.

Note: This is a great bread to serve with soup or chili.

# Are you warming up with space heaters?

As the temperature drops, many families may use portable electric space heaters to help warm their homes.

The Electrical Safety Foundation International warns that space heaters could cause fires and injuries if not used properly. Follow these few simple precautions:

• Read the manufacturer's instruction manual before using any space heater. Check to make sure the heater bears the mark of a certified testing organization.

• Keep space heaters at least 3 feet away from any combustible materials such as bedding, clothing, draperies, furniture and rugs.

• Keep space heaters away from areas with water. Check your manual to be sure the heater is intended to be used in locations such as bathrooms.

• Don't use space heaters in rooms where children

are unsupervised. Children may stick their fingers or other objects through the protective guards, causing burns or shock.

• Avoid using an extension cord with a space heater. If you must use one, make sure it is the right wire gauge size and type for the heater.

• Portable heaters have hot parts that can cause sparking. Do not use them in areas where flammable liquids such as gasoline or kerosene are used or stored.

 Space heaters are meant to supply supplemental heat. Don't use them to warm bedding, cook food, dry clothing or thaw pipes.

• Turn off the space heater and unplug it when not in use.

For more information on electrical safety, visit the ESFI Web site, www.electrical-safety.org

### Agriculture income tax update for farm families now available

For tax years 2009 and 2010, there are a number changes that have resulted from the passage of federal tax laws. These changes can dramatically affect farm families, their farm business and the management of their tax planning.

Section 179 depreciation and bonus depreciation have been extended for the 2009 and 2010 tax years. One challenge here is that the State of Minnesota has not adopted the federal Section 179 and bonus depreciation provisions so additional planning is needed. New for 2009 is a mandatory five-year recovery of depreciation on all new farm machinery placed into service in 2009. This provision replaces the seven-year recovery period for new machinery but still applies to used machinery.

Other farm business tax changes involve wind generator tax issues, income averaging for farmers, net operating loss carry-back calculations, dairy herd retirement program payment issues, and changes to how commodity futures and options contract proceeds are calculated for tax purposes. Tax rates, deduction amounts and phase-out amounts have changed for 2009 and 2010 as well.

In addition to farm business tax changes, there have been several individual and family tax law changes as well. Some of those include new rules regarding the "Kiddie tax." first-time home buver rules, new car deduction, "Cash for Clunkers" tax calculations, and some changes to retirement and learning tax credits.

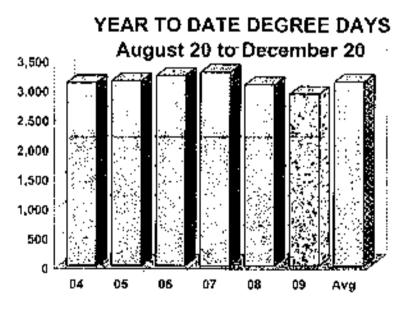

If farm families have questions

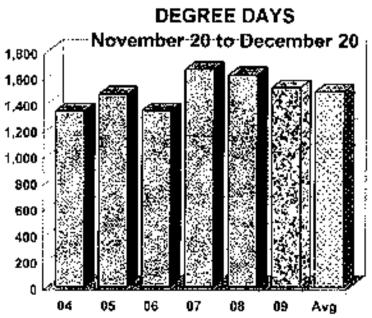

regarding any of the ag tax law changes they can get a free copy of the publication titled "Ag Income Tax Update for Farm Families" from University of Minnesota Extension's Agricultural Business Management Web site at www.extension.umn.edu/AgBusinessManagement.

Source: C. Robert Holcomb and Gary A. Hachfeld, Extension educators.

# **DEGREE DAYS**

To determine degree days, you must calculate the daily mean temperature for the time period you are measuring. Degree day computation is based on the assumption that a building does not require any heat if the outside temperature averages 65 degrees during a 24-hour period. To obtain a degree day figure, the high temperature and the low temperature for the day are added and the total divided by two. That figure is then subtracted from 65. For example, if the high temperature was 30 degrees and the low temperature 10 degrees, the figure would be 30+10=40; 40/2=20; 65-20=45. This would be a 45-degree day. The higher the degree day figure, the more heat required to warm your home.

# **FREE TRIAL UBSCRIP**

Clip out this ad, fill out the form and bring it into our office located at 105 Main Avenue in Red Lake Falls to start a three month FREE trial. The subscription will begin with the Feb. 10, 2010 edition and end with the April 28, 2010 edition. This offer is open to new subscriptions only. This form must be brought in by the subscription holder by Feb. 5. Limit one per household.

### **VOLTS AND JOLTS FEATURE OF THE MONTH**

# **Upholstery business keeps memories alive for Les Trandem**

#### **By Destiny Harmoning**

Les Trandem of Thief River Falls operates an upholstery business in Thief River Falls known as Trandem Custom Upholstery.

Don't let the name fool you, though. Les is a jack of all trades and he offers more than just upholstery work. Throughout his life, Les has picked up many trades but it all started with upholstery.

Les grew up in Erskine, where his parents owned P&D Upholstery for nearly 20 years. To earn an allowance and permission to go out, Les would work with his father in the shop. It was his version of doing chores, so he really didn't enjoy the work at all.

When his parents retired, they offered to sell the business to Les, but his dislike of the chore was still fresh in his mind so he declined. "Anything but upholstery, I hated it," Les said.

So instead of working in the business, Les went on to technical school in Thief River Falls where he earned an auto body degree. Then he opened his own body shop for awhile.

After doing auto body for sometime, Les decided he wanted to be an art teacher, so he started classes at Bemidji State University.

Following a stint at BSU, Les worked several jobs, mainly auto body and construction work.

Then he studied at a technical college in Detroit Lakes where he learned how to do sign painting, airbrushing and pin striping.

Then Les continued working auto body and construction jobs. When it got difficult for him to compete with younger, more-able workers in the construction field, he went back to school for the fourth time.

He studied architectural drafting at Northland Community and Technical College in Thief River Falls. Upon acquiring his degree, Les moved to California where he designed high-end homes under a familyowned business. When it came time for the owner's son to move up into the business, Les was let go and that's when he made the decision to move back to Thief River Falls for good.

Les Trandem, owner of Trandem Custom Upholstery

to get started. At first Les declined his friend's offer, remembering his younger years and what a chore upholstery work had been.

"The more times I said 'no', the more times he came back with more stuff," Les said. Finally it got to the point where Les felt he would have been crazy not to start the business with everything his friend set up for him.

Even though upholstery wasn't Les' first career choice, he said he doesn't regret starting the business. "To me it's not hard to do because it's just a matter of remembering what my dad taught me," he said. There's an added bonus that he also gets to work with something he is very passionate about: cars, motorcycles and snowmobiles. This is where Les offers upholstery work for anything from snowmobile seats to office furniture and car seats to dining sets. He also does hand-painted signs and pin striping under the name LT Signs.

That's not all Les will do. He also does work with custom cars including helping members of the car club with their projects and does woodworking, including building belt racks for the Tae-Kwon-Do class and bean bag games.

Les explained that he will pretty much do anything that people will pay him for that he has the capability of doing. A good example of this was a gentleman brought in a 1930 Chevy that had a hole in the windshield. The gentleman explained that no one would help him change the windshield but Les took on the task.

"I haven't really hit anything yet that I've turned down," Les said. "I only say 'no' if I can't get the parts."

On average, Les gets \$2,500 to \$3,000 worth of inquiries each week. The number and type of job always varies.

He explained that certain things come in during certain seasons. For example, he has done about two dozen snowmobile seats in the past

two weeks. "It all depends on what

"It all depends on what the season is, what's foremost on their mind," he added. Les added that he is just starting to get inquiries about boats and pontoons, since their season will be coming up next.

Some of the projects he was working on included custom car seats for a Mercedes, the interior of a 1972 GMC, fishhouse cushions and bucket seats for a two-seater airplane.

The plane seat is a project that is going to prove to be quite challenging for Les. He explained that he

Les Trandem also does hand-painted signs and woodworking, in addition to upholstery at his business.

also wants to be able to make a decent living off of it. He stated that if one of his children was interested, he would like to pass down the business to them.

Les said that he does the upholstery work in memory of his father and said he still looks to him for advice on difficult projects.

Les said operating his business brings back memories for him. He grew up during the times where certain styles that are coming back in originated from. He even designed his shop to look like an old-style Rod shop or malt shop. He hand-painted every square of the checkered floor and put up wall tins from the 50s and 60s. His intention is to create an atmosphere that takes people back to a time that is not-so-long forgotten. Trandem Custom Upholstery is open Monday through Friday, typically 8:30 a.m. to 5:30 p.m.; call 218-689-4012.

A friend had suggested that Les start an upholstery business and offered him some equipment and supplies

Les Trandem operates his upholstery business in memory of his father, who handed down an antique sewing machine from his own upholstery business.

In his free time, Les enjoys dabbling in cars, motorcycle riding, watching snowmobile races and summertime activities such as camping and fishing. He is also

> a member of the Street Wizards Car Club of Thief River Falls.

Another perk of owning his own upholstery business is being able to stay with his family. When doing architectural drafting, he had traveled away from them and in a year-and-a-half span, he only saw them twice.

Now he lives at home with his wife Julie and two of their three children: Zach, a senior in high school, and Lauren, a junior. Their oldest child, Jordan, lives and works in Madison.

Les has been operating his business for 18 months. It started out in his garage but has been in its current location for the past year. Les rents part of the building owned by Ron Philipp of Ron's Auto Sales. needs to take a flat piece of foam and mold it into two side-by-side bucket seats and then embroider the plane's logo into the backrest.

The most common type of work that Les does is car interiors and seats. "It's fine by me because I like playing with that kind of stuff," he commented.

He further explained that there are two other uphol-

stery businesses near by, both of them operated by woman who focus mainly on furniture. He said upholstery work in cars requires more than just knowledge of sewing fabric together and that a bit more handling is required.

Les said his turn-around time on job orders is fairly quick but always depends on the size of the project and when the customer needs it. Some customers tell him they need it for a certain season or event and others say they are in no hurry, so Les takes his time on them.

"Ninety-five percent of the time I try not to keep anything longer than a week," he said.

In the future, Les said he would like to see his business continue to grow. He

A project that Les Trandem is working on through his business Trandem Custom Upholstery is changing the color of the inserts in the seats of a Mercedes.

The Oklee substation has two circuits leaving the substation. The south circuit supplies electricity to members south and west of Oklee. The north circuit is the feed for members north and east of Oklee.

The north circuit is divided at the intersection of County Road 5 and County Road 6 on the north edge of Oklee. At that corner, a two-phase overhead line goes east along County Road 6 and a three-phase underground line goes north along County Road 5.

The underground line had no breakers at this intersection. Without breakers at the source end of the line, if something happened down line, the problem or fault could cause breakers to open at the substation, resulting in an outage for all members receiving electrical service from the north circuit

Recently, breakers were installed at this intersection which sectionalizes the underground line going north. Now if a problem occurs on this north line, it should open one or any number of these newly installed breakers. It will greatly reduce the number of members to be affected by any problem on the north line.

Alan Cota, lead lineman, works to install epoxilators on a corner pole on the south side of the new take-off pole and breaker pole. Insulated blankets are used to cover up hot wires to help avoid any accidental

A new corner/take-off pole is lifted into place on the west side of County Road 5. It is a 40-foot pole and has a cost of \$400 for just the pole.

# Apply now for MCC summer conservation work program for high school youth

through April 23 for 90 positions with the Minnesota Conservation Corps (MCC) Summer Youth Program.

contact.

Youth ages 15 to 18 will be based at a residential program site

Applications are being accepted in St. Croix State Park for eight weeks. They will travel in crews led by staff members to various state and federal lands to camp out and work on conservation projects.

"Participants can expect to work hard on projects such as trail construction, erosion control, bridge and boardwalk building, and invasive exotic plant removal," said Eric Antonson, MCC youth programs manager.

The outdoor residential nature of MCC provides a unique opportuni-

ty for youth to develop and strengthen leadership skills, work ethic, camping skills, and an understanding and appreciation for the natural environment.

The experience-based curriculum addresses career development, environmental topics, education planning, and leadership and life skills development. Weekend activities include canoe trips, wilderness hikes and high-adventure challenges. The program runs June 20 through Aug. 14. Participants earn a stipend of \$175 per week, with room and board provided.

Troy Schmitz, lineman, uses coffin hoists to bring the two-phase overhead wires into proper height and tension onto the take-off pole. The wires cross County Road 5 going east.

Work nears completion on the new take-off pole and breaker pole as linemen work to make final grounding connections.

# Minnkota Power and Minnesota Power sign Young 2 Deal

Minnkota Power Cooperative and Minnesota Power have completed a monumental deal in which Minnkota receives needed energy and capacity and Minnesota Power gains a transmission line to transport wind generation.

What is known as the Young 2 Deal has been in the works for about two years.

Minnesota Power will purchase from Square Butte Electric Cooperative a 465-mile, Center to Duluth DC transmission line. Minnesota Power will use the transmission line to deliver wind energy that it is developing at Minnkota's Milton R. Young Station near Center, N.D., to its service area near Duluth.

In return, Minnkota receives an increasing allocation of the Young 2 output of energy and capacity. Between 2013 and 2026 Minnesota Power's current 50 percent allocation of Young 2 will transfer to Minnkota. By 2026 and thereafter, Minnkota will purchase 100 percent of the Young 2 output.

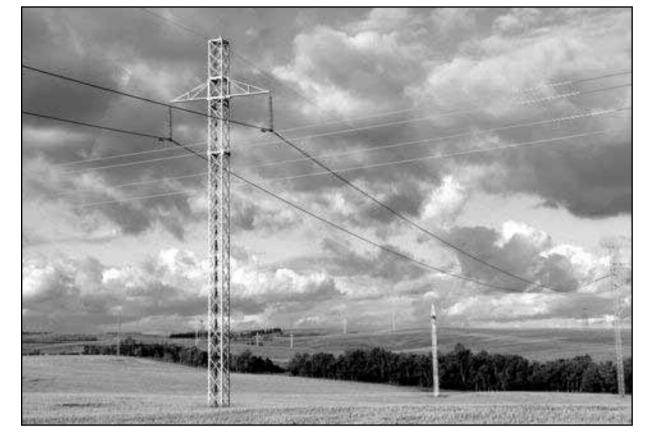

This will give Minnkota 227.5 megawatts of additional capacity and the related energy will be its future power supply, likely at least until 2030.

Young 2, which began producing electricity in 1977, is owned by Square Butte and operated by Minnkota. Square Butte was formed by the Minnkota-associated cooperatives to meet the increasing electrical demand of their consumer-owners and to provide electricity to Minnesota Power.

"Young 2 is a power plant that we know well because we operate it," said Dave Loer, Minnkota president and CEO. "It is low-cost and already in place. It will eliminate our need to build a new coal-fired power plant such as we were considering with Young 3.

"I think we all understand now that building a new coal-fired plant today would be very difficult, time-consuming and expensive."

Minnkota plans to build a new transmission line from Center to deliver all Young 2 energy to the Prairie Substation near Grand Forks.

This approximately 250-mile, \$300 million, 345kilovolt transmission line will be built and in service by early 2013. Called the Center to Grand Forks line, it will allow Young 2 energy to be delivered into the Minnkota system and it will also help the overall northern Red River Valley service area with additional voltage support.

"When compared to the Young 3 option for addi-

tional generation, the Young 2 Deal provides a significant financial benefit to our system. Likewise, the Deal provides benefits to the Minnesota Power system," Loer said.

"We have a long-standing business relationship with Minnesota Power. That sound business relationship has helped both parties negotiate the terms of the Young 2 Deal. There have been some hurdles along the way, all of which have been worked out based on the trusting business relationship with our neighbor and corporate friend, Minnesota Power."

Minnesota Power, an ALLETE company, is building the Bison 1 Wind Energy Center near Center. The 33 turbines will allow for an annual output of 300,000 megawatt-hours of energy. The estimated 75-megawatt, \$180 million project will be constructed in two phases, with half of the turbines up and running by December 2010 and the second half completed by November 2011.

Minnesota Power plans additional phases of wind projects.

"The DC line is a significant piece of our wind development efforts in North Dakota," said ALLETE CEO Don Shippar. "Our strong working relationship with Minnkota was key to putting together this innovative agreement which will bring long term value to each company's customers and shareholders."

The DC line will connect from Center to Minnesota Power's substation in Hermantown, Minn., and be used to deliver the wind-fueled electricity to customers in its service territory in northern Minnesota. It puts Minnesota Power at the forefront of long distance wind energy transport.

A generation and transmission cooperative, Minnkota supplies wholesale electricity to 11 electric distribution cooperatives serving a 34,500-square-mile area in eastern North Dakota and northwestern Minnesota. Square Butte Electric Cooperative is owned by the same 11 distribution cooperatives that own Minnkota. Square Butte owns Young 2, which is operated by Minnkota.

Minnkota serves as the operating agent for Northern Municipal Power Agency (NMPA), which serves 12 municipal utilities in the same geographic region. Together, the Minnkota/NMPA joint system serves more than 130,000 customers.

### Minnesota income tax filing season begins

The Minnesota Department of Revenue announced that the state income tax filing season is officially underway. The department is now accepting individual income tax returns for tax year 2009.

Taxpayers who e-file their returns can do so now and should visit the Minnesota Department of Revenue Web site for information on approved software products. Additional e-file software providers will be added to the department's Web site when they are approved.

"E-filed returns are processed more quickly than paper returns," Commissioner Einess said. "E-filing can increase accuracy, maximize allowable deductions and allow taxpayers to receive the most rapid refund possible."

This year, there are several state tax changes for taxpayers to be aware of:

• Credit for past military service: A non-refundable credit of up to up to \$750 for military veterans who have separated from service and have served in the military for at least 20 years or have a 100 percent service-related disability.

• Credit for new participants in

plan.

• Lower income motor fuels tax credit: A refundable credit of \$25 available for taxpayers in the lowest income tax bracket.

Each year, Minnesota receives 2.6 million income tax returns. Last year, Minnesota was second in the nation with more than 1.9 million e-filed returns, or 73 percent, up 2 percent from 2008. Electronic-filing programs are designed to help filers receive all the credits they qualify for which could lead to a larger refund.

In addition to e-filing, taxpayers can also make payments electronically to control when the money is transferred.

Einess hopes the rapid refund generated by e-filing will eliminate the perceived need of a Refund Anticipation Loan (RAL). Offered by some tax preparers, RALs often charge very high interest rates and reduce a taxpayer's refund. Other tax reminders: • Military tax credit: The refundable Credit for Military Service in a Combat Zone is available to any Minnesota member of the military who served in a designated combat zone or hazardous duty area since Sept. 11, 2001.

The credit is equal to \$120 for each month (or partial month) served in 2009. This is an increase from \$59 for each month of service between 2001 and 2008. The refund for each year of service can only be claimed once. Form M99 must be completed.

The credit expires Oct. 15, 2010 for any service between Sept. 11, 2001 and Dec. 31, 2006.

• Tax reciprocity: The income tax reciprocity agreement between Minnesota and Wisconsin is terminated, beginning Jan. 1, 2010. This does not affect 2009 income tax returns.

For more information regarding state income taxes, visit www.taxes.state.mn.us.

The 2010 Minnesota state park annual permit is now on sale. The new permit showcases the birds and bluffs at Frontenac State Park, located about an hour from St. Paul off U.S. Highway 61 in southeastern Minnesota.

The purchase of a yearround Minnesota state park permit for \$25 provides unlimited access to special events, scenic places, historic sites, a whole roster of outdoor activities and just plain fun at Minnesota's 72 state parks and recreation areas for a full year from the month of purchase.

"Visitors come to Frontenac State Park for many reasons," said Park Manager Harry Roberts. "The reasons include the beautiful scenic vistas, birding in the spring and fall, unusual natural features like the In-Yan-Teopa rock, and the variety of trails for hiking, skiing and snowmobiling."

The photo on the front of the permit shows an eagle

soaring above Lake Pepin. The text on the back notes that "Frontenac State Park, located on the Mississippi River Flyway, is a birdwatcher's paradise, boasting 261 species of birds, the most of any Minnesota state park."

Vehicle permits purchased as gifts come packaged in a Minnesota state parks mini-folder loaded with information to help the gift recipient plan their park visit. Enclosures include the Minnesota State Park winter Programs and Special Events catalog, the Min-

nesota Parks Guide, and brochures about geocaching and camper cabins.

State Parks

**Business Energy** 

Vehicle permits can be purchased at any Minnesota state park or by calling the DNR Information Center at 651-296-6157 or toll-free 888-646-6367.

There is a Minnesota state park within 30 miles of almost every resident and they are all open 365 days a year from 8 a.m. to 10 p.m.

# Pheasant feeding dos and don'ts

Recent snowfalls have resulted in a deep blanket of snow that limits pheasants' access to waste grain, according to the Minnesota Department of Natural Resources (DNR). Providing feed for pheasants can increase their chances of survival.

Pheasants can survive as long as two weeks without food, but they become more vulnerable to predators and adverse weather conditions when they are forced to spend time and energy in the open looking for food.

The DNR offers the following tips for feeding pheasants:

• Do not place feeders near a road. Attracting pheasants (and deer) to roadsides can be dangerous to motorists as well as wildlife.

• Feeders should be placed within 150 yards of good winter cover. This allows the birds to feed and then return quickly to cover. The most important reason for feeding pheasants is to keep them in areas of good winter cover, such as large cattail marshes, shrub swamps, or shelterbelts with at least four rows of evergreens where they stand a much greater chance of surviving winter.

• Place food where birds have been seen feeding in an open, windswept area near thick cover. A high spot with a southern exposure is best.

• Simple feeder cribs can be constructed of hardware cloth that is 3 to 4 feet wide (1/2-inch mesh) and is double-wrapped and hogringed together to form a cylinder. Wire the feeder to a steel post or another object to keep it erect. Designs for constructing barrel feeders can be found on the DNR Web site.

• Once feeding is begun, don't stop until there are large, snow-free areas in fields. Pheasants become dependent on feeders. One of the biggest mistakes is to stop feeding before waste grain becomes available.

# **Program incentives available**

For the past five years, Red Lake Electric Cooperative (RLEC) has had to spend 1.5 percent of gross revenue on conservation programs. The bulk of the money was spent on rebates for Energy Star appliances and equipment.

Starting in 2010, as a directive from the state legislature, RLEC must spend money on conservation programs that yield electric energy savings. Energy conserved must equal 1.5 percent of the Cooperative's total annual kilowatt hour sales.

To meet this directive the Cooperative has launched new

Conservation Improvement Program (CIP) incentives. These incentives are more comprehensive than the previous offerings for both residential and business customers.

Residential offerings span from a \$2 rebate on compact fluorescent lamps (CFL) to \$400 per ton on a geothermal, closed loop heat pump.

Business incentives apply for lighting, air conditioning, air source heat pumps, geothermal heat pumps, chillers, motors, variable frequency drives, and Energy Star food service equipment.

Rebate forms that list the

offerings are posted on RLEC website, www.redlakeelectric.com.

The forms are also available from the Cooperative or local electrical and heating/cooling contractors.

The accompanying tables list many of the incentives.

Custom applications may also apply to business customers. Most energy conservation measures can be explored to see if the measure qualifies for an incentive.

For additional information, contact RLEC at 253-2168 or 800-245-6068.

Energy Efficiency Equipment	Rebate Amoun
T8 Fluorescent Fixtures (Replacing T12 or incadescents)	\$5 to \$16 per fixture

### Director elections to be held

Red Lake Electric Cooperative members in District 3, 6 and 9 will soon elect directors to represent them. The initial elections will take place at the upcoming district meetings. Final election will occur at the Cooperative's annual meeting March 31 if there is more than one nominee.

Districts 3, 6 and 9 are currently represented by Joyce Johnson, Henry Wieland and Peter Mosbeck, respectively. Johnson and Wieland will not seek re-election and Mosbeck will seek re-election.

Directors must be members residing in the district they represent and have no conflicts of interest regarding Red Lake Electric Cooperative. Any candidate for director must have his or her name stated as the "member" on the Cooperative's records.

For more information on director qualifications and responsibilities contact Roger Johanneck, general manager, at 800-245-6068 or 218-253-2168.

### Red Lake Electric Cooperative **Director qualifications requirements**

No member shall be eligible to become or remain a director who:

Is not a member of the Cooperative, receiving electric service at the member's primary residence in the district from which the director is elected.

Within three years preceding a director candidate's nomination was an employee of the Cooperative.

Is or becomes, or at any time during the three (3) years preceding a director candidate's nomination shall have been employed by a labor union, which represents, or has represented, or has endeavored to represent any employees of the Cooperative.

Is a parent, spouse or cohabitant of any employee of the Cooperative.

Is a person who is a parent, spouse or cohabitant of an incumbent director who is not up for re-election at that time

Is in any way employed by or substantially financially interested in an enterprise competing with the Cooperative or any Cooperative-affiliated businesses.

Is or becomes the full-time employee or agent of, or who is or becomes the full-time employer or principal of, another director

### **Director nomination** and election procedure

The procedure for which directors can be nominated and elected for Red Lake Electric Cooperative is outlined in Article II, Section 10, of the Cooperative's Bylaws. That section reads as follows:

SECTION 10. NOMINATION AND ELECTION OF DIRECTORS. (a) Nomination at District Meetings. Not less than forty days nor more than sixty days before any meeting at which directors are to be elected, the board of directors shall call a separate meeting of the members of each district from which directors are to be elected, at a suitable place in such district for the purpose of selecting a candidate for director to represent the members located within such district. The notice of such meeting shall be delivered to each member located in such district as provided in Section 2 of this Article and shall indicate the district to which such member belongs. The notice shall state that nominations for a director are to be made at the meeting. The district meeting shall be called to order by the director representing the district or by another designated representative of the board of directors, or in his absence, by any members residing in the district. The members shall then proceed to elect a chairman, who shall be someone other than a director, and who shall appoint a secretary to act for the duration of the meeting. Members of other districts present at the meeting may be heard but shall have no vote. Nominations for candidates for director shall be made from the floor at the meeting, and any member residing in the district shall have the right to nominate one candidate. The meeting shall remain open for nominations until no further nominations are forthcoming.

Candidates must be members residing in the district and must possess the qualifications for director specified in Section 2 of Article III of these bylaws. Voting shall be by ballot and proxy voting shall not be permitted at any district meeting. Each member may vote for one candidate. The candidate receiving the highest number of votes shall be declared the official candidate of the district. In case of a tie, the winner shall be determined by the flip of a coin. The minutes of the district meeting shall set forth, among other matters, the name of each person nominated at the meeting and the number of votes received by each and shall specify the official candidate of the district. A certified copy of the minutes signed by the Secretary and the Chairman of the district meeting shall be delivered to the secretary of the Cooperative at the following meeting of the board. (b) Nomination of Directors by Petition. Nomination for director can also be made by petition. Fifteen (15) or more members may make a nomination in writing to the Secretary over their signatures not less than thirty (30) days prior to the annual meeting. This petition nomination must be in the format prescribed by the Secretary. Blank nomination petitions shall be available to all members at the Cooperative office. All petition nominees shall be listed in the notice of annual meeting and their names shall be printed on the election ballot. (c) Election of Directors. At the annual meeting, the Secretary of the Cooperative shall place in nomination the names of the official candidates of each district. Election of directors shall be by printed or mimeographed ballot, separate ballots to be provided for each district, listing the candidates in alphabetical order. Only members of a district shall be entitled to vote for director to be elected from that district, and each member or member's spouse shall be entitled to vote for one candidate from the district, in which he is a member. The candidate from each receiving the highest number of votes at this meeting shall be declared elected as director. In the case of a tie vote, the winner shall be determined by the flip of a coin. Notwithstanding anything contained in this section, failure to comply with any of the provisions of this section shall not affect in any manner whatsoever the validity of any election of directors.

#### VOTING DELEGATE CERTIFICATION

Members that are corporations, churches, townships, schools or other government units may vote at the district meeting. This form designating the voting delegate must be filled out, signed by officers and presented at the district meeting registration desk.

### STATEMENT OF NONDISCRIMINATION

Red Lake Electric Cooperative, Inc. is the recipient of Federal financial assistance from the Rural Electrification Administration, an agency of the U.S. Department of Agriculture and is subject to the provisions of Title VI of the Civil Rights Act of 1964, as amended, Section 504 of the Rehabilitation Act of 1973, as amended, the Age Discrimination Act of 1975, as amended, and the rules and regulations of the U.S. Department of Agriculture which provide that no person in the United States on the basis of race, color, national origin, age or handicap shall be excluded from participation in, admission or access to, denied the benefits of, or otherwise be subjected to discrimination under any of this organization's programs or activities.

The person responsible for coordining this organization's nondiscrimination compliance efforts is Roger Johanneck, Manager.

Any individual, or specific class of individuals, who feels that this organization has subjected them to discrimination may obtain further information about the statutes and regulations listed above from and/or file a written complaint with this organization; or the Secretary, U.S. Department of Agriculture, Washington, D.C. 20250; or the Administrator, Rural Electrification Administration, Washington, D.C. 20250. Complaints must be filed within 180 days after the alleged discrimination. Confidentiality will be maintained to the extent possible.

### **AUTO PAY OFFERED BY RLEC**

Red Lake Electric Cooperative is pleased to offer you Auto Pay. Now you can have your monthly energy bill paid automatically from your checking or savings account. You can receive the Auto Pay service by completing the Auto Pay sign-up sheet and returning it to Red Lake Electric Cooperative.

The Auto Pay service is free of charge. Not only is this service free, you will eliminate the expense of writing a check, postage to mail your payment and no more late payment penalties because your bill will be paid on time, every month, for you.

Your payment will be automatically made for you on the 5th of each month. If the 5th falls on a week-

end or holiday, the payment will be made on the next business day. You will continue to receive your monthly energy bill as you have in the past, indicating the amount that will be withdrawn from your bank account. The proof of your payment will appear on your bank statement and your next month's enerav bill statement.

Continue to pay your monthly bill until you are notified on your bill that the Auto Pay has been set up for you.

If you have any questions about the Auto Pay please call RLEC at 800-245-6068 or 218-253-2168

# **NOTICE TO MEMBERS**

The Red Lake Electric Cooperative, Inc., of Red Lake Falls, as an operating electric utility in the state of Minnesota, is obligated to interconnect with and purchase electricity from co-generators and small power producers.

The cooperative will provide information relating to the said interconnections to all interested member-consumers of the cooperative free of charge upon request.

Any disputes between the cooperative and its member-consumers over interconnection, sales and purchases are subject to resolution by the Minnesota Public Utilities Commission.
